DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 7, 8, 17-22 and 25-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Kessler et al. (4,413,748).

Kessler et al. disclose, in figs. 3-5 and 7-10, a container comprising a container body 62, a protective element 10 having a perimeter, a first side and a second side, ribs 22, 26 extending about the perimeter of the protective element defining interrupted areas positioned adjacent the edge of the container body, and a gripping element 20 located on the second side and aligned with the interrupted areas (see fig. 7). The protective element is in the form of a cup having a raised edge being supported on the edge of the container body, two addition interrupted areas (areas between ribs 88). The container further comprises a lid 64, which is capable of axially immobilizing of the protective element when the lid is in a fitted position.

Response to Arguments

3. Applicant's arguments with respect to claims 1-4, 7, 8, 17-22 and 25-29 have been considered but are moot in view of the new ground(s) of rejection.
